

*This dictation tool is designed to aid in completely recording pertinent MARCQI intraoperative data. Please include the following information in your operative report or brief operative note*

## **PRE-OP DIAGNOSIS:**

### **REASONS FOR REVISION:**

- Joint Infection
- Malalignment
- Aseptic Loosening
- Metal Reaction/Metallosis
- Osteolysis
- Poly liner wear
- Implant Failure
- Instability/Dislocation
- Peri-prosthetic fracture (Femur or Acetabulum)

## **POST-OP DIAGNOSIS:**

### **PROCEDURE PERFORMED:**

- Primary Total Hip Arthroplasty (Conventional)
- Primary Total Hip Arthroplasty (Resurfacing)
- Conversion or Previous Hip Surgery to Total Hip Arthroplasty
- Revision Total Hip Arthroplasty

### **ANESTHESIA:**

- Block
- Spinal
- General
- Local
- Epidural

### **APPROACH:**

- Anterior
- Antero-lateral
- Posterior
- Transtrochanteric
- Other (Explain)

### **OPTIONAL TECHNIQUES:**

- Computer Assisted
- Custom Implants
- ETO
- Prefabricated Blocks
- Robotic Surgery (Cori, Mako, Navio, Omnibotic, Orthotaxy, Robodoc, Rosa, Other)

### **INTRA-OP COMPLICATIONS:**

- Fracture
- Tendon/Ligament
- Vascular Injury
- Nerve Injury
- Other (Explain)
- None

### **METHOD OF IMPLANT FIXATION:**

- Cemented / Uncemented
  - Femoral
  - Acetabular

### **CEMENT – OTHER USE:**

- Poly liner cemented to acetabular shell
- Build-up bony defect
- Antibiotic beads
- Other (Explain)

### **WERE ANTIBIOTICS ADDED TO CEMENT:**

- Indicate if added by Surgeon or Manufacturer
- List all antibiotics used

### **WAS ANTIBIOTIC *POWDER* INTRODUCED INTO THE JOINT SPACE:**

- Yes
- No

### **WERE ANTIBIOTICS INJECTED INTO THE *INTRAOSSSEOUS SPACE*:**

- Yes
- No

### **SOLUTION USED TO IRRIGATE:**

- Antibiotic solution
- CHG – containing solution
- Povidone-Iodine
- Normal Saline – without additive
- Other (Explain)

### **TRANEXAMIC ACID (TXA):**

- IV
- Oral
- Topical

## **PROCEDURE DETAILS: (DICTATE YOUR REPORT)**
